P. BHUVAN CHAND REDDY

Guntur, Andhra Pradesh | +91 7032911271 | vu.241fa04d02@gmail.com | GitHub | LinkedIn | LeetCode

PROFESSIONAL SUMMARY

Computer Science undergraduate with a full-stack software engineering foundation across Python, Flask, React.js, JavaScript, MongoDB, SQL, and applied machine learning (OpenCV). Experienced in designing RESTful APIs, database-backed CRUD systems, and cloud-deployed production applications, with hands-on exposure to data analytics and cross-functional collaboration through academic and program-based projects. Seeking a Software Engineering Intern role at Wipro to contribute to scalable, production-grade systems while continuing to build expertise in AI-driven and cloud-native development.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering 2024 – 2028

Vignan's Foundation for Science, Technology and Research **CGPA: 7.50 / 10**

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems

TECHNICAL SKILLS

Web & API Development: Flask, React.js, RESTful APIs, HTML5, CSS3, Cross-functional Collaboration
Languages: Python, JavaScript, C, SQL
Databases & Cloud Deployment: MongoDB (incl. MongoDB Atlas), MySQL, Render.com
AI / Machine Learning / Data Analytics: OpenCV, face_recognition, Applied Data Analytics
Tools & Platforms: Git, GitHub, VS Code, Postman
Core CS Subjects: Data Structures & Algorithms, DBMS, Object-Oriented Programming, Operating Systems

PROJECTS

SmartAttendanceAI — Face Recognition Attendance System Live Demo | GitHub Repo

Python · Flask · OpenCV · face_recognition · MongoDB Atlas · Render.com (Cloud Deployment)

- Architected and deployed a real-time facial recognition attendance system using OpenCV and face_recognition, automating check-in workflows and eliminating manual attendance tracking.
- Designed a Flask REST API backend integrated with MongoDB Atlas for persistent attendance logging, deployed to production on Render.com, and validated recognition accuracy through structured testing across lighting, camera, and Windows environment variables.

Placement Preparation Web Application GitHub Repo

Flask · MongoDB · HTML · CSS · JavaScript

- Engineered a full-stack web application enabling students to organize, categorize, and track placement preparation progress, improving structured content management for end users.
- Designed and implemented RESTful CRUD API endpoints with Flask and MongoDB, and built responsive HTML/CSS/JavaScript interfaces to support data analytics on preparation progress across devices.

Hotel Booking System Web Application GitHub Repo

Flask · MongoDB

- Developed a full-stack hotel booking platform automating end-to-end reservation workflows and room management using Flask and MongoDB.
- Architected normalized MongoDB collections and implemented real-time room-availability tracking, enabling efficient querying and reliable data analytics across booking records.

CodeAlpha Event Manager — Backend GitHub Repo

Python · REST API

- Built and deployed 6 RESTful API endpoints for an event management backend as part of the CodeAlpha program, handling event creation, retrieval, updates, and deletion.
- Structured request handling and data operations within a cross-functional program setting to deliver reliable, scalable CRUD functionality through a clean API layer.

CERTIFICATIONS

- NPTEL — Leadership and Team Effectiveness
- NPTEL — Introduction to Psychology
- Deloitte Data Analytics Job Simulation — Forage
- Operating Systems — Cisco Networking Academy
- JavaScript Essentials — Cisco Networking Academy

ACHIEVEMENTS

- Solved 50+ Data Structures and Algorithms problems on LeetCode, strengthening algorithmic problem-solving skills.
- Achieved a CodeChef rating of 869 (1★ Division 4) through consistent competitive programming practice.
- Participated in 2+ hackathons, 1 technical workshop, the Promptmaster prompt-engineering challenge, and a technical typing assessment.
